Quality Improvement Program

Absolute Total Care (Medicare-Medicaid Plan) is improving the quality of care for our members. We created a Quality Improvement (QI) Program to help you become healthy and stay healthy. The main goal of this program is to make sure you receive quality care and services that are safe for your healthcare needs.

Absolute Total Care has a medical director who oversees all of the QI Program activities. These activities will look at your health in different ways. Activities include preventive health, acute and chronic care, behavioral health, over- and under-utilization, continuity and coordination of care, and patient safety. All of these activities will make sure that you are receiving the highest quality of care.

Healthcare Effectiveness Data and Information Set (HEDIS®)

Every year, Absolute Total Care is measured on the progress of our quality goals. The tool used to measure our progress is called the Healthcare Effectiveness Data and Information Set, or HEDIS. HEDIS scores let Absolute Total Care know which program activities are needed to help improve the healthcare of our members.

Below are results for selected measures from the last three calendar years for the Medicare-Medicaid Plan (MMP):

Measure	CY 2017	CY 2018	CY 2019
Diabetes HgbA1C testing	91.05%	91.48%	94.16%
Diabetes HgbA1c Adequate Control (<8%)	48.59%	53.77%	45.26%
